

APRU

GLOBAL HEALTH WORKSHOP

Hosted By Osaka University

October 30-November 1, 2015

LIST OF PRESENTERS & MODERATORS

PHOTO	NAME	EMAIL	UNIVERSITY	BIO
	Anthony Abustan	docankz@gmail.com	University of the East Ramon Magsaysay Memorial Medical Center	<p>Anthony Abustan is a registered nurse who specializes in global health, public health & disaster risk reduction and management. He finished a course program in Public Health, Disaster and Humanitarian Response under the Collaborating Centre for Oxford University and Chinese University of Hong Kong for Disaster and Medical Humanitarian Response. He is currently in a Doctor of Public Health program with a major in Health & Disaster Management at Our Lady of Fatima University – Main Campus. He also finished a Master of Science in Public Health at the University of the East Ramon Magsaysay Memorial Medical Center – Graduate School. He received the Philippine Council for Health Research & Development Research Grant. He also did a Bachelor of Science in Nursing at Far Eastern University – Manila. He is a Faculty of Master of Science in Public Health Program (University of the East Ramon Magsaysay Memorial Medical Center – Graduate School), Technical Support Writer (Asia Pacific E-Journal on Health Social Sciences), External Referee (Philippine Journal of Public Administration) and the Administrative & Training Division Head and Disaster Risk Reduction / Climate Change Adaptation Research (DRR/CCA) Supervisor at the Marikina City Disaster Risk Reduction & Management Office. His fields of interest include global health, public health, ASEAN integration, policy development, total quality management, and disaster risk reduction & management.</p>

	Richard Adanu	rmadanu@yahoo.com	Ghana	<p>Richard Adanu is the Dean of the School of Public Health, University of Ghana and Professor of Women's Reproductive Health. He is a specialist obstetrician gynaecologist and women's reproductive health epidemiologist. He graduated from the University of Ghana Medical School and completed his postgraduate training in obstetrics and gynecology at the Korle Bu Teaching Hospital in Ghana. He has a Master of Public Health (MPH) degree from the Johns Hopkins Bloomberg School of Public Health. His research covers epidemiology of obstetric and gynaecological disorders in Ghana, family planning, cervical cancer screening and maternal morbidity.</p>
	Azimatun Noor Aizuddin	azimatunnoor@gmail.com	National University of Malaysia	<p>Azimatun Noor Aizuddin is a Senior Lecturer in Department of Community Health, Faculty of Medicine, UKM. She obtained her Medical Degree from USM in 1997 and Master Community Medicine (Hospital and Health Management) from UKM in 2006. She is a PhD student under the Faculty of Medicine, UKM collaborating with United Nations University – International Institutes of Global Health (UNU=IIGH), under Professor Dato' Dr. Syed Mohamed Aljunid supervision on Assessing Ability and Willingness to pay for healthcare among Malaysian. She has served Ministry of Health, Malaysia for several years in various fields before becoming an academician in the University Kebangsaan Malaysia. Her main interest is in Health Economics and Financing & Health Management and Quality. She has involved in the health economy, health financing, health management and health quality researches with universities and MOH. She is an assistant editor for the International Journal Public Health Research (IJPHR) and reviewer of a few journals locally and abroad. She has published and presented a number of papers in her fields. She holds a position of an honorary secretary for the Malaysia Health Economics Association (MAHEA), life member of the Malaysian Public Health Physicians Association and member of MySPOR (Malaysian Pharmacoeconomics and Outcome Research Group).</p>

	<p>Augustine Ankomah</p>	<p>aankomah@ug.edu.gh</p>	<p>Ghana</p>	<p>Augustine Ankomah has a PhD in Applied Population Research from the University of Exeter in the United Kingdom. Between 1992 and 2001, he taught Reproductive Health in three British Universities: University of Exeter; University of Wales at Swansea; and University of Teesside. Prof. Ankomah has blend of academic, programme implementation, research and consultancy experience in HIV and reproductive health including family planning and maternal health. In 2001 Dr Ankomah joined Population Services International (PSI), an international public health NGO headquartered in Washington DC, and worked for ten years in Nigeria and East Africa. During the period he served in various senior level capacities for PSI in West and East Africa. In Nigeria, he was the Senior Technical Advisor for Research and Behaviour Change Communication. In East Africa, he was the Regional Technical Advisor (based in Nairobi) for a large scale multi-country project in promoting long-lasting family planning products. For all the projects, he provided technical lead and oversight over the design and evaluation components. In 2011, Prof Ankomah returned to Ghana and took up appointment as the Head of Department for Population, Family and Reproductive Health, School of Public Health, University of Ghana. His current research area lies in adolescent reproductive health, HIV prevention, particularly among at-risk populations. Over the past 25 years, Prof Ankomah has conducted individual research, led international multi-centre collaborative research, published in several peer-reviewed international journals and presented at several international conferences. He has considerable experience in teaching, supervising and examining post graduate students.</p>

PHOTO	NAME	EMAIL	UNIVERSITY	BIO
	Atsuko Aoyama	atsukoa@med.nagoya-u.ac.jp	Nagoya University	<p>Atsuko Aoyama is the head of Department of Public Health and Health Systems, Nagoya University School of Medicine, since 2001. Her research subjects include: (1) non-communicable disease (NCD) risk factors in low and middle income countries; (2) health policies and health systems in developing countries; and (3) gender and health. She also teaches public health to graduate students and undergraduate medical students. She sometimes advises local health agencies regarding NCD prevention strategies, and international development agencies such as the Global Fund to Fight AIDS, Tuberculosis and Malaria, Japan International Cooperation Agency (JICA), etc. for monitoring and preparing health sector assistance programs. She was awarded M.D. and Ph.D. at Nagoya University School of Medicine. Before entering international public health career, she studied pathology and cell biology, focusing on retroviruses and cancer metastasis. Then she practiced obstetrics and gynecology as a certified clinical specialist in a large public hospital in Japan. Prior to joining Nagoya University, she worked for the World Bank as a health specialist, as well as Japanese bilateral assistance programs in the health sector. She contributed to develop health sector programs in countries such as Egypt, Yemen, Palestine, Pakistan, Cambodia, and Thailand.</p>
	Ririn Arminsih W	uwaraw@yahoo.com	University of Indonesia	<p>Ririn Arminsih holds a DDS from Faculty of Dentistry, Universitas Indonesia, a Master of Public Health from Faculty of Public Health Universitas Indonesia, and a Doctor of Epidemiology, from Faculty of Public Health Universitas Indonesia. She is a lecturer since 1988.</p>

	Sachiko Baba	baba@cir.med.osaka-u.ac.jp	Osaka University	Sachiko Baba, MD, Ph.D. is Vice Director of Center for International Relations, Osaka University Graduate School of Medicine. She graduated from Osaka University Medical School in 2004. In 2008 she was appointed Assistant Professor of Center for International Relations to promote education and research activities with overseas institutions. Her consistent attitude toward reproductive epidemiology drove her to work as a post-doc a Karolinska Institutet in Sweden in 2011-12.
	Rajasekhar Balasubramanian	ceerbala@nus.edu.sg	National University of Singapore	Prof. Bala obtained his Ph.D. from the Rosenstiel School of Marine and Atmospheric Science, University of Miami, USA and worked at Brookhaven National Laboratory and at the New York State Department of Health as Research Scientist prior to joining NUS in 1996. For the past two decades he has performed research on air quality, health risk assessment, environmental toxicology and regional environmental issues in Southeast Asia; he is the author of over 165 scientific papers in these areas including several scholarly review articles. He has received several awards honoring his work including Alan Berman Research Publication Award from the US Department of the Navy in 2014. Prof. Bala has led, or helped to lead, multiple air quality field studies in Asia.
	Muhammad Abdul Basit Ahmad Tajudin	abdulbasit.1712@gmail.com	National University of Malaysia	Muhammad Abdul Basit Ahmad Tajudin has a background in environmental health. He is currently focusing on research in the field of environmental epidemiology.

	Besral	besral@yahoo.com	University of Indonesia	<p>Besral was born on 31st January, 1972 in West Sumatera Province, Indonesia. After finishing his bachelor degree in Faculty of Public Health, University of Indonesia, Jakarta in 1994, he completed his Master of Science (majoring on Biostatistics and Epidemiology) in the College of Public Health, University of the Philippines, Manila in 2000. He completed Doctor of Public Health in the University of Indonesia Jakarta in 2011. Since 1997 he has been working as a lecturer in the Department of Biostatistics and Population Studies, Faculty of Public Health University of Indonesia. At the same time, he is also working as a researcher for the Center for Health Research, University of Indonesia. He was appointed as Secretary of the Department of Biostatistics and Population Studies, University of Indonesia, from year 2004 to 2007 and Chairman of the Department from 2014 to now. He teaches the graduate and undergraduate students in the Faculty of Public Health University of Indonesia. His research focuses on maternal & child health and health information systems.</p>
	Mahfuzur Rahman Bhuiyan	mahfuzdoc@yahoo.com	Campaign for Tobacco Free Kids, National Heart Foundation and Research Institute, Bangladesh	<p>Mahfuzur Rahman Bhuiyan received an MBBS from Sir Salimullah Medical College under Dhaka University then completed MPH from The University of Melbourne, Australia. Later he did a post-graduate Diploma on Development Planning from National Academy for Planning and Development, Dhaka. He also participated in a certificate course on Global Tobacco Control in Johns Hopkins Bloomberg School of Public Health, USA. He is now working in Campaign for Tobacco Free Kids, Bangladesh Chapter as a Grants Manager. He has also worked at the National Heart Foundation Hospital & Research Institute as Project Officer and at the World Health Organization as a National Consultant. He has been working in the public health sector for more than 11 years and has been involved in many research activities and nationally representative surveys like the Global Adult Tobacco Survey 2009 Bangladesh, the National NCD Risk Factors Survey 2010, the National Survey on Hearing Impairment in the Bangladesh population, and the Evaluation of Baby Alive Media Campaign. His research interests are in tobacco control.</p>

	Jaime Javier Cantu Pompa	jjcantup@gmail.com	Tech de Monterrey	Jaime Cantu is currently a medical student at Tecnologico de Monterrey, School of Medicine, in Monterrey Mexico. He is completing his last year of medical formation doing social service.
	Erlinda Castro-Palaganas	ecpalaganas@up.edu.ph	University of the Philippines	Erlinda Castro is a professor of management, an internationally distinguished and respected nurse leader, researcher and academician. She is a pioneer in qualitative nursing research and a multi-awarded health research mentor. She is a Professor at University of the Philippines - Baguio where she excels in teaching, research and extension work. She is a nurse who has opted to commit herself to serve the Filipino people. She is a staunch advocate of people's rights and welfare -a people's nurse.
	Chang-Chuan Chan	ccchan@ntu.edu.tw	National Taiwan University	Chang-Chuan Chan is the Professor of Institute of Occupational Medicine and Industrial Hygiene, and the Associate Dean and Director of the Global Health Center at CPH, NTU. Prof. Chan is a Steering Committee Member of the APRU Global Health Program, 2014-2016. He serves as an academic counselor of International Society for Environmental Epidemiology, 2015-2017. He is also chair-elected of ISEE Asia chapter since 2015. Prof. Chan serves as the Chairman of Taiwan Chapter of SRA since 2009. Prof. Chan has led over 100 research projects on environmental epidemiology, air pollution exposure and health assessments, and global health issues. He has published over 160 scientific papers in SCI journals. Prof. Chan established Global Health Practicum in Malawi and São Tomé for NTU students, and educational exchanges with universities in Japan, Korea, and the US, and started PhD in Global Health Program at CPH since 2012. He was an international participant in the European Union's FP7 project, ESCAPE, and is currently conducting international environmental

				epidemiological studies on air pollution in Malaysia, Thailand, Mongolia, India.
	Angela Chang	wychang@umac.mo	University of Macau	<p>Angela Chang (Ph.D., Union Institute & University, USA) is Assistant Professor at University of Macau, Macau, China, Special Administrative Region. She works in the advertising profession as a marketing researcher before she joins the academia. Her research areas are about audience studies, eye-tracking, cross cultural consumer studies, and health communication. She has published over 20 journal articles and book chapters and presented over 50 conference papers. She is the author of Advertising Behavior: The Contemporary Unwritten Rules, Principles, and Cultures of Advertising as Practiced in Taiwan (Chinese Culture University Press, 2003) and contributor to The Ashgate Research Companion to Fan Cultures (Ashgate Publication, 2014) as well as the chapter contributor of Advertising and childhood obesity in China (Springer, 2014). She is the external researcher on health and Communication studies at Lugano University, Switzerland and scholarship/grant holder at Austria and Taiwan's Universities. Her articles won several top papers for Excellence in China's top universities.</p>
	Hung-Lun Chang	alanci2003@gmail.com	National Taiwan University	<p>Hung-Lun Chang is a graduate student of Institute of Occupational Medicine and Industrial Hygiene, National Taiwan University (NTU). He received B.S. in public health from Taipei Medical University (TMU), Taipei, Taiwan in 2013. He was acting member of medical services team from 2011 to 2013. He has been serving as president of graduate student association of College of Public Health, NTU in 2014. His research interests are health risk perception, occupational health, nanotoxicology and global health.</p>

PHOTO	NAME	EMAIL	UNIVERSITY	BIO
	Chi-Hsin Sally Chen	syernie.chen@gmail.com	National Taiwan University	Chi-Hsin Sally Chen is a second year PhD student from National Taiwan University. Her research interests are the health impacts of environmental exposure, and her thesis topic is focused on the metabolomics study of petrochemical pollutants exposure.
	Chen-Chieh Chen	r03849027@ntu.edu.tw	National Taiwan University	Chen-Chieh Chen is a first-year master's student in the department of epidemiology and preventive medicine at National Taiwan University. His research interests include chronic diseases, especially the risk factors of type 2 diabetes. He earned his bachelor's degree in health promotion and health education at National Taiwan Normal University in 2014. He is now working on his master thesis on the topic of the association between vitamin D deficiency and the risk of type 2 diabetes.
	Mengqi Chen	14211020049@fudan.edu.cn	Fudan University	As the Outstanding Graduate of Nanjing Medical University, CHEN Mengqi participated in lots of voluntary activities in assisting migrant workers' children and completed a one year internship experience in the local hospital in Yixing City, Jiangsu Province. During the last six years, she has shown great interest in the field of public health and now is a master student majoring in Maternal and Child Health in Fudan University.

	Szu-Ying Chen	r93841013@yahoo.com.tw	National Taiwan University	<p>Szu-Ying Chen is now the attending physician of Department of Critical Care Medicine, E-Da hospital. He is also a Assistant Professor of the College of Humanities and Management, Fooyin University and also at National Taiwan University. Dr. Chen specialized in clinical medicine and environmental epidemiology. His research interest involves the health impacts of ambient air pollution. He has been studying the effects of ambient air pollution on cardiovascular system, including the cardiovascular morbidity, blood pressure, and other cardiovascular parameters in response to both short- and long-term air pollution exposures.</p>
	Ying-An Chen	r03844002@ntu.edu.tw	National Taiwan University	<p>Ying-An Chen (or Angie) is from Taiwan and is now a graduate student in the Institute of Environmental Health at National Taiwan University. Her major is tropical medicine and vector control. She went to Sao Tome and Principe in Africa to do malaria control practicum training. Her research interests focus on malaria.</p>
	Wan-Lin Chiang	linlinjan@hotmail.com	National Taiwan University	<p>Wan-Lin Chiang is currently a fifth year PhD candidate in Institute of Health Policy and Management at the National Taiwan University under Professor Tung-liang Chiang. Her doctoral work focus on the topic of child poverty and child health. She holds MS in Public Health and BS in Nursing both from the National Cheng Kung University.</p>

	<p>Kuo-Liong (KL) Chien</p>	<p>klchien@ntu.edu.tw</p>	<p>National Taiwan University</p>	<p>Kuo-Liong Chien received his Medical Degree from Medical College, National Taiwan University in 1988. After training a cardiologist in National Taiwan University in 1995, he undertook the graduate course and received the PhD degree in College of Public Health, National Taiwan University in 2000, majored in genetic epidemiology and cardiovascular epidemiology. Now as the professor and director in the Institute of Epidemiology and Preventive Medicine, he conducts a prospective cohort study in a community for cardiovascular disease risk factor prevention. He has published more than 200 scientific papers on cardiovascular diseases, including coronary disease, stroke, diabetes, hyperlipidemia and hypertension prevention. His contribution to public health is on non-communicable disease (NCD) management and prevention in Taiwan, and his interests in NCD as actively attending the annual meeting of AWI (APRU World Institute) as the representative of National Taiwan University College of Public Health and the annual meeting of Asia Pacific Academic Consortium for Public Health (APACPH). He is currently the chief executive in the Taiwan Clinical Trial Statistical Center, sponsored by Ministry of Science and Technology, to support the clinical trial protocol development and data management for disease-related consortiums in Taiwan.</p>
	<p>Yi-Chen Chou</p>	<p>r03844014@ntu.edu.tw</p>	<p>National Taiwan University</p>	<p>Yi-Chen Chou a master student from National Taiwan University. She is learning about global environmental issues in graduate school. Her main research subject is air pollution in the ambient environment, especially the concentration of PAHs in particulate phase (PM2.5). She is also learning about receptor models for environmental monitoring and source apportionment.</p>

	<p>Er Ay Choy</p>	<p>eacukm@yahoo.com</p>	<p>National University of Malaysia</p>	<p>Er Ay Choy received a PhD in Environmental Sciences from Wageningen University, The Netherlands. She also holds a M.Arts (Economics) from Universiti Kebangsaan Malaysia and a Bachelor of Arts (Economics) (with Honours) from Universiti Kebangsaan Malaysia. Her fields of expertise are: 1. Policy and Environmental Management; 2. Ecological Modernization; 3. Ecotourism; 4. Environment Economics. She is now the Head of Quality Assurance FSSK (2012- present). She also held the Chief Science Program Development, PPSP, FSSK, UKM (2011-2012) and the Chairman of the Unit for Economic and Management Studies, FSP, UKM (1997-2001). She has worked as an Assistant Lecturer at UKM and Sunway College (Monash University). She is now a Professor at UKM in the School of Social, Development & Environmental Studies. Her professional skills include: 1. MyClimate 2008; 2. Writers Association of Malaysia (member of CWAM); 3. Member: Malaysian Social Science Association; 4. International Center for Asian Studies (ICAS) Fellowship / Membership; 5. Malaysian Society of Environmental Epidemiology (MYSEE); 6. ERNASIA NETWORK.</p>
	<p>Tzu-Hung Chuang</p>	<p>r02848005@ntu.edu.tw</p>	<p>National Taiwan University</p>	<p>Tzu-Hung Chuang is a graduate student at the Institute of Health Policy and Management, National Taiwan University. She will present a poster which is related to her master's thesis. She is concerned with health policy decision-making.</p>

	Pei-Hua Chung	emilychung714@gmail.com	National Taiwan University	Pei-Hua Chung is a PhD student of 5 grade. She has a background in healthcare management and moved into health policy and management in 2008. Since then she has concerned about occupational health and safety. Her research interests including work-related injury and illness, mental health of injured workers, social inequality of injured workers.
	I Wayan Darwata	wyndarwata@ymail.com	Warmadewa University	I Wayan Darwata, MD, MPH, was retired from the Faculty of Medicine, Udayana University in 2010 as Associate Professor of Public Health. Since then he has been associated with the Faculty of Medicine Warmadewa University in Denpasar Bali (Indonesia) as Associate Professor in Public Health and Vice Dean of internal affairs. His main research interests include health in elderly and community-based health system.

PHOTO	NAME	EMAIL	UNIVERSITY	BIO
	Kartika Anggun Dimarsetio	anggun.ds@gmail.com	University of Indonesia	<p>Kartika Anggun Dimarsetio is a junior lecturer in Health Education and Behavioral Science Department, Faculty of Public Health, Universitas Indonesia. “Tika” has involved in several researches and activities related to tobacco prevention program. When she was undergraduate student, she lead a students’ movement to advocate UI’s rector to sign Smoke-Free Campus Policy. Her master thesis used Structural Equation Model to describe the smoking behavior pattern among emerging adulthood (18-25 years old) in Indonesia. She also involved in collaboration study between SEATCA and FPH UI for describing tobacco industry compliance on PHW packaging. Tika also active in planning, implementation, and evaluation of pilot project Not On Tobacco program (Smoking cessation for high school students) in Depok City funded by UI. Since 5 month ago, she is co-leader for pilot project on peer educator program funded by UI. She is currently working to assure the sustainability of this project and is assisting the DHO of Depok City to earmark tobacco tax for implementing and scaling-up this program. As Vice General Secretary of ISPHE (Indonesian Society for Health Promotion and Education), she was involved in advocacy project of earmarking tobacco excise on several districts and cities in West Java funded by Health Bridge Canada.</p>
	Lassie Fitria	lassie05@gmail.com	University of Indonesia	<p>Lassie Fitria is a graduate student in environmental Health at the Faculty of Public Health, University of Indonesia. She is also a member of the Graduate Student Association of the Faculty of Public Health. She works as an Assistant Research and Teaching Assistant in the Occupational Health and Safety Department.</p>

	Makoto Fujii	m.fujii@sahs.med.osaka-u.ac.jp	Osaka University	Makoto Fujii is a student at the Osaka University Graduate School of Medicine (Suita city, Osaka) since Apr. 2014 in the Master of Science in Health Science program. Prior to this, he received his bachelor of science in nursing from the University of Shiga Prefecture (Hikone city, Shiga) in 2009. He works at the Saiseikai Senri Hospital (Suita city, Osaka). He is a registered nurse and public health nurse.
	Qian Gao	gaoqianwgg@163.com	Peking University	Qian Gao is a student in the Department of Social Medicine and Health Education at the School of Public Health, Peking University in Beijing. In October 2013, she took part in the World Health Summit in Berlin. In 2013 she also participated in the China Health Forum "Young Leaders on China-Africa Collaboration Get Ready to Lead." She has several publications focusing on universal health care and elderly long-term care.
	Junfei Guo	13211020022@fudan.edu.cn	Fudan University	Junfei Guo is a graduate student at Fudan University in the Key Laboratory and the School of Public Health. She has been involved in studies related to child nutrition and health in the Department of Nutrition and Food Hygiene. Up until now she has published a paper, "Lessons on the interventions of child malnutrition in China" in the Chinese journal of Child Health Care. Now she is involved in the GHSP-OP1-02 project and doing research on breastfeeding interventions in China.

PHOTO	NAME	EMAIL	UNIVERSITY	BIO
	Ella Nurlaela Hadi	ellanhadi@yahoo.com	University of Indonesia	Ella Hadi holds a DDS from the Faculty of Dentistry, Universitas Indonesia, as well as an MSPH and a DrPH from Faculty of Public Health, Universitas Indonesia. She is a Lecturer in the Dept. of Health Education and Behavioral Sciences, Univ. Indonesia, majoring in Health Promotion, Research Methodology (Quantitative and Qualitative), Health Communication, Training and Education. Her research areas are: reproductive health (maternal-neonatal and child health, family planning), communicable disease (HIV-AIDS, TB, malaria, diarrhea, acute respiratory infection and pneumonia).
	Noran N Hairi	noran@um.edu.my	University of Malaya	Noran N Hairi [MBBS, MPH, MPH (Epidemiology), PhD] is an Associate Professor in the Department of Social and Preventive Medicine. She served for several years with the Ministry of Health, Malaysia before becoming an academic in the University of Malaya in 2004. Her interest in chronic diseases, geriatrics and gerontology led to her active involvement in several large-scale projects such as PEACE (Prevent Elder Abuse and neglect initiative), STeMM (Spatio-Temporal Modelling and Meta-analysis), MELoR (Malaysia Elder Longitudinal Research), CLUSTER (Clustering of Lifestyle risk factors and Understanding its association with Stress on health and wellbeing among school Teachers) and HELP (Health promotion, Education and Lifestyle interventions in special Populations). Noran has published widely in peer-reviewed journals, book chapters and editorials. She has served as the Head of Julius Centre University of Malaya (Centre of Clinical Epidemiology and Evidence Based Medicine) from 2011 – 2014.

	Indri Hapsari	indri@ui.ac.id	University of Indonesia	Indri Hapsari Susilowati is a lecturer in Occupational Health and Safety Department, Faculty of Public Health, Universitas Indonesia. Her research interests in Ergonomics, aging study, and safety transportation, She completed her Doctor of Philosophy from Kyushu University researching on the role of visual, cognitive, and physical motor skill as risk factors for elderly drivers. One of her award was got Award AusAid IndII Road Safety Initiative Improved Performance of Road Safety in 2013.
	Tutik Sri Hariyati	rrtutik@yahoo.com	University of Indonesia	Tutik Sri Hariyati is a Lecturer in the Faculty of Nursing, Universitas Indonesia. Her research interests are nursing management, technology and nursing informatics.
	Budi Haryanto	bharyanto@ui.ac.id	University of Indonesia	Budi Haryanto, MSPH, MSc is an Associate Professor and former chair of the Department of Environmental Health - Faculty of Public Health (2004-2011) and Head of Research Division of the Research Center for Climate Change University of Indonesia (2010-present). Dr. Haryanto is a Board of Directors of the Pacific Basin Consortium on Environment and Health 2008-2017. Dr. Haryanto has participated in numerous environmental epidemiology studies. In addition to research on health effects in children of air pollution, including lead, PM 2.5, nano-particles, and biological exposures, he is also interested in the effects of magnetic fields on human health, community trial of calcium supplement intervention to reduce children's blood lead levels and antioxidant intervention to reduce sick building syndrome among professionals working in high buildings in Jakarta. Most recently, he has actively contributed to the studies and development of policy and action plan of health adaptation to climate change.

	Miyuki Hasegawa	hasegawa@pbhel.med.osaka-u.ac.jp	Osaka University	Miyuki Hasegawa has a MMedSc and is a Ph.D. student of Department of Public Health, Grad School of Medicine in Osaka University. Her research focuses on epidemiology and feasible prevention for obesity and obesity-oriented Non-communicable Diseases (NCDs). She dedicate on collaboration research to address serious health issue in Republic of Palau whose faces high-prevalence of obesity and NCDs. She is strongly interested in global health through intern experience WHO HQ and field trips to foreign countries.
	Helda	helda_dr@yahoo.com	University of Indonesia	Helda, M.Kes. was born in Bukittinggi Indonesia. She is a lecturer in the Department of Epidemiology at the School of Public Health, University of Indonesia. She graduated from the doctoral program in epidemiology at the University of Indonesia in 2013.
	Milla Herdayati	millaherdayati@gmail.com	University of Indonesia	Milla Herdayati is on the Faculty of Public Health, University of Indonesia in Biostatistics and Population Studies.

	Thi Hien Ho	hth1@hsph.edu.vn	Hanoi	Thi Hien Ho is a lecturer at the Hanoi School of Public Health. She has a PhD in Public Health and Community Medicine from the University of New South Wales, Sydney. Prof. Hien has 18 years of experience in doing research on health issues especially injection drug use and HIV risk, including having worked in both Sydney and Vietnam. She has national and international publications on health issues particularly HIV/AIDS among high risk groups.
	Rozita Hod	gieto1@gmail.com	UKM	Rozita Hod is an associate professor at the National University of Malaysia. She received her degree in Medicine in 1993 and worked as medical officer in Kuala Lumpur General Hospital as well as Penang General Hospital. In 2006, she obtained her Masters in Public Health and continued her service with the Ministry of Health, in the Disease Control Division. Soon, she decided to venture into the academic world and joined the National University of Malaysia to pursue her interest in teaching and performing research in environmental and occupational health. She is supervising students in doing research projects on occupational and environmental hazards. Currently, she resides in Kuala Lumpur with her husband and three children.
	Victor Hoe Chee Wai Bin Abdullah	drvictorhoe@gmail.com	University of Malaya	Associate Professor Hoe is an Occupational Physician with a practice in the University Malaya Medical Centre. He heads the Centre for Occupational and Environmental Health-University of Malaya (COEHUM) a research centre focused on occupational and environmental health research and consultation, and the Occupational and Environmental Health Unit in the Department of Social and Preventive Medicine, University of Malaya. He has published numerous peer reviewed manuscripts and guidelines. He is an editorial member for the Journal of Health and Translational Medicine (JUMMEC), Frontiers in Public Health and Medical Journal of Malaysia. He is also a registered Public Health subject consultant for Environmental

				Impact Assessment (EIA) studies with the Department of Environment Malaysia. In 2014, he was involved in three EIA projects with various consultation firm. The EIA projects are the establishment of a cement plant in Gua Musang, Kelantan, hydroelectric project in Jerantut, Pahang, aluminium smelter plant expansion project in Bintulu, Sarawak, and petrochemical plant expansion in Pasir Gudang, Johor. His research interests include worksite wellness, musculoskeletal disorders, ergonomics, health risk assessment, Evidence-Based Medicine and systematic reviews.
	Ryo Horiike	ryohoriike@sahs.med.osaka-u.ac.jp	Osaka University	Ryo Horiike is an MNS, RN, RPHN. He is now a Ph.D. Candidate at the Graduate School of Medicine, Division of Health Sciences, at Osaka University. In 2013 he received his Master of Nursing from the Graduate School of Integrated Arts and Sciences from Kochi University and in 2011 he received his Bachelor of Science in Nursing from the same university.
	Hui-Hsuan Hsu	'p87877511@hotmail.com.tw'	National Taiwan University	Hui-Hsuan Hsu is a graduate student at National Taiwan University majoring in statistics. In her spare time, she likes to exercise and read novels.

	Jei-Yie Huang	r03849020@ntu.edu.tw	National Taiwan University	Jei-Yie Huang is from Taiwan and got her M.D. degree from College of Medicine, National Taiwan University. She is now an attending physician in nuclear medicine department of National Taiwan University Hospital. She is continuing her master degree program in Institute of Epidemiology and Preventive Medicine, College of Public Health, National Taiwan University under the guidance of Prof. Kuo-Liong Chien. Her main research area is cardiovascular imaging.
	Ya-Ping Huang	d03849017@ntu.edu.tw	National Taiwan University	Ya-Ping is a PhD student at the Institute of Epidemiology and Preventive Medicine, National Taiwan University. She is also a physician currently working in NTUH, and her expertise area is rehabilitation and public health. Her main research area is statistical analysis on National Health Insurance (NHI) Database in Taiwan.
	Pottyan I	u963593d@yahoo.co.jp	Osaka University	Pottyan I is currently a student at the Faculty of Medicine at Osaka University.

	Hiroyasu Iso	iso@pbhel.med.osaka-u.ac.jp	Osaka University	Hiroyasu Iso is Professor of Public Health and Vice Dean of Osaka University Graduate School of Medicine. He graduated from medical school in 1982 and received PhD in 1986 from University of Tsukuba, and MPH in 1988 from University of Minnesota under the Fulbright Scholarship. He worked as visiting Associate Professor of Medicine in Harvard University in 1996-1997. His major is epidemiology and prevention of lifestyle-related disease and published over 500 original articles in this area, and he leads national research projects on birth cohorts, genomic cohorts and lifestyle-related disease epidemiology. He has directed Mater of Public Health (MPH) program in Osaka University. He serves as the head of trustees for Japan Epidemiological Association, and a national representative for the WHO informal consultation group of NCD experts.
	Yon Ho Jee	minniejee@daum.net	Sookmyung Women's University	Yonho Jee, is a student of the department of Statistics in Sookmyung Women's University, Seoul, Korea. Her current research is focused on Age-Period-Cohort(APC) study for colorectal cancer, which was published in Asia Pacific Journal of Cancer Prevention. She is also conducting another paper on APC study for lung cancer. She is a research assistant to the Korean Cancer Prevention Study-II. This is a Large-scale cohort study of traditional and genetic risk factor on cancer risk among the Korean population.
	Masamine Jimba	ohjimba@gmail.com	University of Tokyo	Masamine Jimba is a professor and chair in the Department of Community and Global Health at the Graduate School of Medicine, University of Tokyo. He studied at Japan's National Institute of Public Health and the Harvard School of Public Health. His practical experience includes disease control and health promotion activities in developing countries, first as a WHO Health Coordinator for the Gaza Strip and the West Bank from 1994 to 1996. From 1996 to 2001, he implemented health promotion programs in rural Nepal, using a community development approach, as a public health expert with the Japan International Cooperation Agency. In 2002, he came back to Japan to have a base in the university and has been working on health projects in Asia, Africa and Latin America. His current research interests include

				health promotion, global health policy, health and development, and maternal, newborn and child health.
	Dewa Ayu Putu Ratna Juwita	ratnajwt_unwar@yahoo.com	Warmedewa University	Ratna Juwita graduated as a medical doctor from Udayana University in the Faculty of Medicine in 2010. Since 2012 she has been working as a lecturer in the Faculty of Medicine at Warmadewa University in the Department of Public Health. She currently also works as Secretary of the Quality Assurance Unit. She is a member of the Team of Items Reviewers, and a member of Clinical Skill Laboratory, as well as a facilitator for small group discussions by the students at the Faculty. Her main research interests include epidemiological statistics and medical education practice.
	Hoon Eng Khoo	bchkhe@nus.edu.sg	National University of Singapore	Associate Professor Khoo is a graduate from Smith College, St. Mary's Medical School (London) and University of Dundee. She taught at the Faculty of Medicine, National University of Malaysia for 10 years before joining the Faculty of Medicine (now Yong Loo Lin School of Medicine) at the National University of Singapore (NUS) in 1988. She has taught medical, dental, science undergraduate and PhD students. Her scientific research interests have been in the study of bioactive components of venoms and toxins. She was a member of the International Society of Toxinology, Secretary-General of the Federation of Asian and Oceanian Biochemists and Molecular Biologists and was active on the Education Committee of the International Union of Biochemistry and Molecular Biology. She has published research articles and books in medical education and led faculty development workshops as Deputy Head of the Medical Education Unit and Associate at the NUS Center for Development of Teaching and Learning. Between 1997 and 2003, she was Vice-Dean in the Faculty of Medicine and was part of a team that developed a new curriculum for the medical course and life sciences course. During a leave of absence from NUS, she worked for three years (2007-2010) as the Provost and Acting Vice-Chancellor of the Asian University for Women in Bangladesh. After returning to NUS, she was Deputy Director of the

				International Relations Office before joining Yale-NUS College in October 2011 where she is now the Director for Special Projects in the Office of the President.
	Yuri Kitamura	ytkitamura@envi.med.osaka-u.ac.jp	Osaka University	<p>Yuri Kitamura, M.D., Ph.D. is an Associate Professor of the Division of Environmental Medicine and Population Sciences, Graduate School of Medicine, Osaka University. Prior to coming here, she was an Assistant Professor of the Department of Physiology (1997-2007), engaged in Neuroscience and Biophysics. After she graduated from the Faculty of Medicine in 1990, and worked as an Anesthesiologist at the Osaka University Hospital, she began to do a research about biophysical mechanisms of the motor proteins at the ERATO, Yanagida Bio-Motoron research project from 1993 to 1997. Besides she participated to the Break-Through 21st Project, the Ministry of Internal Affairs and Communications (1998-2002), because of her expanding research interest especially to Neuroscience. As she started to work as a Psychiatrist since 2002, became a psychiatric specialist in 2008, and authorized occupational physician in 2012. She studied abroad at the Imperial College London, Hammersmith Hospital and Cyclotron Unit (2003-2005). Now she devotes herself to Epidemiology, making challenge to mental health problems in Japan.</p>
	Ayako Kohno	kohnoayako@gmail.com	University of Malaya	<p>Ayako Kohno is currently a Master's Candidate at the Kyoto University Graduate School of Medicine, School of Public Health in the Department of Health Informatics. From October 2014 - September 2015 (scheduled) she has been at the University of Malaya, Malaysia in the Faculty of Medicine, Department of Social and Preventive Medicine. She is a Master of Medical Science (MMedSc) candidate through a double-degree program between Kyoto University and the University of Malaya.</p>

In 1987 she was a Graduate in Sociology, Andalas University, Padang, West Sumatera, Indonesia. From 2014 until now, she is Head of Department of Health Education and Behavioral Sciences, Faculty of Public Health, University of Indonesia. She has worked as a lecturer and researcher since 1990 at Faculty of Public Health, University of Indonesia.
	Jorge A Martínez Cardona	xorges@gmail.com	Instituto Tecnológico y de Estudios Superiores de Monterrey	Jorge A Martínez Cardona is a medical doctor. He was born in Coahuila, Mexico. He received his MD from Tecnológico de Monterrey and is currently affiliated there. He also received a Master in Business Administration, in Health Care Management from Anahuac University. His main research interests are: medical education and pediatric hematology/oncology.
	Judith McCool	j.mccool@auckland.ac.nz	University of Auckland	Judith McCool is Senior Lecturer in Global Health at the School of Population Health, University of Auckland. Judith completed her Master of Public Health 1997 (Otago University) and PhD (University of Auckland) in 2002. Since this time she has been an active contributor to research in the field of health risk perceptions, tobacco control, media and global health. Judith is both lead and co-investigator on numerous international and national research projects funded by HRC, Bloomberg Initiative, World University Network, Ministry of Health and an active collaborator research and capacity building initiatives on in partnership with WHO and Secretariat for the Pacific Communities. Since being appointed to senior lecturer in global health, Judith has

				<p>developed networks in Asia Pacific region; Latin America and North America, where she has participated in country and regional forums for global health and tobacco control. The Global Health Group, led by Judith, been awarded a Vice Chancellor's Strategic Development Award (2009) and an International Research Team Development Award (2010) to enhance international global health collaboration. She is the coordinator of Andrews Family fellowship initiative between the School of Population Health and the Fiji School of Medicine. Her major research interests including mHealth and tobacco cessation, tobacco industry activity in the Pacific region, media interpretations and health behaviours.</p>
	Katsuyuki Miura	miura@belle.shiga-med.ac.jp	Shiga Medical University	<p>Dr. Katsuyuki Miura received his M.D. in 1988 and his Ph.D. in public health and epidemiology in 1993 from Kanazawa University School of Medicine, Kanazawa, Japan. He is Professor and Chair of the Department of Public Health (since 2009) and Director of the Center for Epidemiologic Research in Asia (CERA) (since 2013), Shiga University of Medical Science, Otsu, Japan. His research interests include cardiovascular disease epidemiology, nutritional epidemiology for cardiovascular prevention, and health education and public health policy for cardiovascular prevention. He has been the principal investigator of the NIPPON DATA funded by the Ministry of Health, Labour and Welfare of Japan since 2010, and was the PI of several research grants including the Shiga Epidemiologic Study of Subclinical Atherosclerosis (SESSA).</p>

	<p>Foong Ming Moy</p>	<p>moyfm@ummc.edu.my</p>	<p>University of Malaya</p>	<p>Associate Professor Foong Ming Moy is from the Epidemiology & Biostatistics Unit, Department of Social & Preventive Medicine, Faculty of Medicine, University of Malaya, Kuala Lumpur, Malaysia. She teaches Research Methodology, Biostatistics, Clinical Epidemiology & Evidence-Based Medicine, Principles and Methods of Epidemiology to both undergraduate and postgraduate candidates. Her research interest includes translation research, trials in prevention of non-communicable diseases, workplace wellness and nutritional epidemiology. Dr Moy is one of the editorial board members of the Nutrition Journal of Malaysia. She is also the coordinator for the UM Cochrane Network site, Malaysian Cochrane Branch, under the Australasian Cochrane Centre. Dr Moy is active in research and has published extensively in both local and international journals.</p>
	<p>Yasuhide Nakamura</p>	<p>Yastisch@aol.com</p>	<p>Osaka University</p>	<p>Yasuhide Nakamura is a Professor of International Collaboration, Graduate School of Human Sciences, Osaka University. After he graduated from The University of Tokyo, and worked as a pediatrician at Tokyo Metropolitan Hospital, he started global health to encourage maternal and child health in Indonesia as a Japan International Cooperation Agency (JICA) expert (1986-88) and to promote refugee health program in UNHCR Pakistan Office (1990-91). He was a Takemi Fellow (1996-97) in Harvard School of Public Health for international health. He is widely interested in conducting research through interdisciplinary approach in the spirit of fieldworker; Maternal and Child Health (MCH) Handbook Programs in many countries, humanitarian relief for refugees and victims by natural disasters, medical interpreting in hospitals and health care system in Japan. Dr. Nakamura is the representative of Health and Development Service (HANDS), a global health non-profit organization (NPO) and the representative of Japan Association of International Health (JAIH). He is a chairperson of Japan Association of Medical Interpreters (JAMI).</p>

	Ken Nakata	ken-nakata@umin.ac.jp	Osaka University	<p>Ken Nakata is currently a Professor, Dept. of Health and Sport Sciences, Medicine for Sport and Performing Arts, and a Professor, Dept. of Global and Innovative Medicine, at the Osaka University Graduate School of Medicine. He is also the Director of the Center for Global Health at the Osaka University Hospital. He received his MD and PhDs from Osaka University. His research focuses on molecular and cellular biology of cartilage, developmental biology, molecular pathology of skeletal diseases, osteoarthritis, biomechanics of ligament, tendon and cartilage, regenerative medicine of cartilage and meniscus, Sports Medicine, arthroscopic Surgery and global health.</p>
	Hiroki Nakatani	nakatanih@keio.jp	Keio University	<p>Hiroki Nakatani is presently Professor for Global Health and Innovation at Osaka University and Professor for Global Initiatives at Keio University. He is also Advisor, International Affairs, Ministry of Health, Labour and Welfare. He worked as Assistant Director-General of the WHO from March 2007 to May 2015. He led the largest technical cluster comprising HIV/AIDS, Tuberculosis, Malaria and Neglected Tropical Diseases, with a staff of more than 300 multi-nationals. During his tenure, the morbidity and mortality of these three major infections showed trends of decline, and a few tropical diseases were on track towards elimination and even eradication in case of dracunculiasis (guinea worm disease). Before joining WHO, he worked at the Ministry of Health, Labour and Welfare of Japan. During a long career at the Ministry, he acquired extensive technical experience in public health including tuberculosis and HIV/AIDS, as well as immunization, non-communicable diseases, health promotion, health emergencies, management of national hospitals and health workforce development.</p>

	<p>Azmawati Mohammed Nawawi</p>	<p>azmawati@ppukm.ukm.edu.my</p>	<p>National University of Malaysia</p>	<p>Azmawati Mohammed Nawawi MD (Azmawati MN) is a researcher in the area of public health. She graduated from National University of Malaysia with a medical degree in 1999. In 2010, she obtained her Masters in Community Medicine, specialising in Epidemiology & Statistics. After 5 years of work experience working in general hospitals and district hospitals she joined the National University of Malaysia in 2004 as training lecturer in the Faculty of Medicine. Since then she has researched various areas of public health focusing primarily on epidemiology. She is interested in research on cancer, clinical trials and population-based studies. She has published several articles relating to public health and epidemiological health. Some of her research has included: 1) to identify the hazard risk of survival among hepatocellular cancer, 2) the quality of life among post-surgical cervical cancer patients, 3) web-based obesity interventions among adolescents and 4) text message-based interventions on smoking among young adults. She has collaborated with international universities such as Niigata University, Japan. She is a lifetime member of the Malaysian Association of Public Health Physicians.</p>
	<p>Narila Mutia Nasir</p>	<p>narilamutia@gmail.com</p>	<p>Hidayatullah State Islamic University</p>	<p>Narila Mutia Nasir received her Ph.D from Osaka University, Japan. She is a lecturer at Public Health Department, Faculty of Medicine and Health Sciences, Syarif Hidayatullah State Islamic University Jakarta, Indonesia. Her research focuses on Maternal and Child Health, Reproductive Health, Community Nutrition, and Health Promotion and Health Education. She has done research related to health education media for pregnant women, the utilization of Maternal and Child Health (MCH) Handbook focusing on oral care, and the use of health media promotion to improve knowledge on Dengue Hemorrhagic Fever among School Children. Recently, Narila has become interested in environment as one of the determinants of health. She is working on research about environmental health risk assessment, particularly in quantifying the burden of disease by using Disability Adjusted Life Year (DALY). She was involved in the making of MCH handbook for foreigner in Japan particularly for Indonesian Language Version.</p>

				She also had a collaboration research with HANDS Japan (Health and Development Service). As for her contribution to community in Indonesia, she enjoys promoting health by being speakers in Health Integrated Post, School, and Neighborhood's gathering on topic about nutrition and reproductive health.
	Juhwan Oh	juhwan.oh328@gmail.com	Seoul National University	Juhwan Oh is Professor of International Health Policy and Management of Seoul National University College of Medicine. He is interested in Maternal, Child, and Adolescent Health, Health Insurance Policy, and Health Inequality. He has been teaching and researching Global Health topics in the school and consulting Korea Government for global health ODA. He is also serving as secretary of Dr. Lee Jong-Wook Center for Global Medicine of Seoul National University.

	Kai Hong Phua	spppkh@nus.edu.sg	National University of Singapore	<p>Kai Hong Phua is a tenured professor at the Lee Kuan Yew School of Public Policy, National University of Singapore and was previously Associate Professor and Head, Health Services Research, Department of Community, Occupational & Family Medicine at the Faculty of Medicine and Adjunct Senior Fellow at the Institute of Policy Studies, Singapore. He graduated with honours <i>cum laude</i> from Harvard University and received graduate degrees from the Harvard School of Public Health and London School of Economics & Political Science. Dr Phua was the co-lead and corresponding author of the overview article in the <u>Lancet</u> Series on Health in Southeast Asia (2011). He is Guest Editor of the <u>Social Science & Medicine</u> special issue on Health Systems in Asia and co-editor, Ageing Asia Series of World Scientific. He delivered the ST Lee Lecture 2012 at the Menzies Centre for Health Policy of the University of Sydney and Australian National University. He has produced numerous publications in health policy and related areas. He served as Associate Editor of the <u>Singapore Economic Review</u> and <u>Asia-Pacific Journal of Public Health</u>. Dr Phua received The Outstanding Young Person award in 1992 in Singapore. He was a past Vice-Chairman of the Singapore Red Cross, served on the Board of Management of the Home Nursing Foundation and was a founder Council Member and Chairman, Resource Committee of the Gerontological Society. He was Chairman of the Task Force on Social Services 2015. He has been appointed on many national advisory</p>

				committees, including the Government Parliamentary Committee Resource Panel on Health. He has consulted for many international organizations, including the WHO, the Asian Development Bank, Red Cross, World Bank, and UNESCAP.
	Nurhayati Prihartono	nungkip@yahoo.com	University of Indonesia	Nurhayati Prihartono holds a Sc.D. degree in epidemiology from the University of Massachusetts, Lowell (2008), an M.P.H and M.Sc. in epidemiology from Boston University's School of Public Health (1987 and 1999), and a D.D.S. from University of Indonesia, Faculty of Dentistry (1981). Since 1982, she has been on the faculty at the Department of Epidemiology School of Public Health at University of Indonesia. She participates in the Indonesian Public Health Association's Advisory Committee for epidemiology. She is on the editorial board of Ministry of Indonesia Research and Development's Jurnal Buski. Dr. Prihartono's research focuses on epidemiology of non-communicable disease, tuberculosis, health related work-environmental exposures. She has published several articles in peer reviewed journals.
	Deshinta Rosalina Puspitasari	deshintarosalina@gmail.com	University of Indonesia	Deshinta is a fourth year undergraduate nursing student in University of Indonesia. She is interested in health topic and knowledge development and has proven this interest through her involvement in events and competition around health development. She has also produced some papers about geriatric nursing, public health, and transcultural nursing.
	Yi Qian	13111020034@fudan.edu.cn	Fudan University	Yi Qian is now is a PhD student in the Social Medicine Department in Public Health School of Fudan University. Her dissertation mainly focuses on the health workforce in Laos. Before getting involved in the public health field, Yi worked in Family Medicine Department of a 3A level general hospital in China as a physician for three years after graduation from medical school with a bachelor degree of clinical medicine. She

				<p>also studied at the Liverpool School of Tropical Medicine (LSTM) where she received a Master of International Public Health (MIPH), and completed her thesis on family planning services in Nigeria.</p>
	<p>Xuezheng Qin</p>	<p>xqin@pku.edu.cn</p>	<p>Peking University</p>	<p>Xuezheng Qin is an associate professor in the School of Economics at Peking University. He earned his B.S. from Peking University and his Ph.D. in Economics from the State University of New York at Buffalo. His primary research interests include health economics, labor economics, and applied econometrics. He has published numerous papers in peer reviewed journals such as China Economic Review, Health Policy and Planning, European Journal of Health Economics, and Geneva Papers on Risk and Insurance. His research is funded by National Natural Science Foundation of China, Ministry of Education of China, International Development Research Centre (Canada), and others. He is included in Beijing Higher Education Young Elite Teacher Project and has won many other awards. Dr. Qin serves on the editorial board of China Health Review and as an external reviewer for many international journals. In Peking University, Dr. Qin teaches Econometrics, Health Economics and Chinese Economic Transition. His current research focuses on health insurance, health related behaviors, non-communicable diseases and regional distribution of healthcare resources in China.</p>

	<p>Alex Ross</p>	<p>Alexrossa@who.int</p>	<p>Director of WHO Centre for Health Development</p>	<p>Mr Ross is the Director of the WHO Centre for Health Development (Kobe, Japan or WKC), a global centre for excellence in research on the consequences of social, economic and environmental change and its implications for health policies. Mr Ross oversees the Centre's new research strategy that focuses on advancing universal health coverage (UHC), innovation, and ageing; as well as the Centre's portfolio leading WHO's work on urban health, inclusive of a focus on health inequities, health governance and intersectoral action, and urban health emergencies. The Centre is part of WHO's Headquarters' Health Systems and Innovation Cluster. He is a public health policy expert trained in the United States at the University of California in Los Angeles (UCLA). Prior to his joining the Centre, he served as Director for Partnerships at WHO Headquarters (Geneva) for four years, as well as in senior advisory posts to Assistant Director-Generals for Communicable Diseases and for HIV/AIDS, TB and Malaria for four years. During this time, he led development of a WHO partnerships policy, nurtured WHO's engagement with global health initiatives, non-governmental and private sectors. He also provided inputs to the Pandemic Influenza Preparedness framework negotiations, including strategies for engaging vaccine manufacturers, other private sector entities, and the World Bank/IMF to help provide funds to countries in need. Mr Ross was very involved in developing innovative health financing approaches, such as the Solidarity Tobacco Contribution, and has been part of the creation of the Global Fund to Fight AIDS, TB and Malaria and UNITAID. Before joining WHO, Mr Ross served in senior positions in the UK Department for International Development between 2001 and 2003, and in several U.S. Government agencies between 1987 and 2001 (USAID Bureau for Africa, U.S. Public Health Service, U.S. House of Representatives' Energy and Commerce Committee, and U.S. General Accounting Office).</p>

Mazrura Sahani

mazrura@gmail.com

National University of Malaysia

Mazrura Sahani is a Medical Lecturer at the National University of Malaysia (UKM) since 2006. She obtained a PhD in Environmental Management for Health from University of Western Sydney, Australia, a Master in Public Health from UKM and a Medical Degree from Catholic University of Leuven Belgium. She is the Principal Public Health Consultant for >30 EIA/ HIA projects since 2006. In 2011 she was appointed as WHO Consultant for 'Development of guidance document on health risk assessment for solid waste management' by the Engineering Services of the Ministry of Health, Malaysia and for "Development of Environmental Impact Assessment (EIA) Guidelines for Solid Waste Incinerator Guidelines on Public Health – by the DOE". In 2013 she was appointed as the lead consultant to review "Medical Surveillance Guidelines for Workers Health" (DOSH, Malaysia). She is Founding President of Malaysian Society of Environmental Epidemiology (MySEE). She served at the Ministry of Health from 1991-2006 with the last posting in the Environmental Health Research Center, Institute for Medical Research, Kuala Lumpur. She has organised several training/ workshops and seminars in HIA/ EHIA since 2008. Her research interests are: Impact of the Environmental and Occupational Exposure to Human Health with special interest in the health effects of air pollution and haze, Impact of Climate Change on Public Health and GIS application in Health Risk Analysis.

Nurezdiani Said

atharzaim@yahoo.com.my

National University of Malaysia

Nurezdiani Said is married with 2 kids. She is in her 2nd year of the PhD program at National University of Malaysia where she loves to interact with people to gain as much as knowledge as possible. She is conducting research on Health Risk Assessment of Volatile Organic Compounds (VOCs) of workers and community members in palm oil plantations in Malaysia. This focuses on Biogenic Volatile Organic Compounds (BVOCs). She has 8 years teaching experience at a private institution in Malaysia. She plans to become a specialist in Occupational Safety & Health, especially in industrial hygiene.

	Ryoto Sakaniwa	ryt.sknw@gmail.com	Osaka University	<p>Born in Gunma, Japan, Ryoto's global health career started after the East Japan great earthquake. In 2011, he worked at Miyagi Prefectural Center for Disaster and Health management office as an epidemiological analyst. He holds two master's degrees (Msc in International Health and Master in Public Health) from England. He is currently working at Osaka University Department of Public Health as well as Osaka Center for Cancer and Cardiovascular Preventing as an analyst. In March of 2015, he was dispatched as a member of FMT (Foreign Medical Team) epidemiologist and supportive Researcher of WHO-WPRO. He also was awarded testimonials from Miyagi Prefecture and Tohoku University in 2012 and the Social Determinants of Health workshop award in 2014.</p>
	Jonathan Samet	jsamet@usc.edu	University of Southern California	<p>Distinguished Professor, Flora L. Thornton Chair, Department of Preventive Medicine, University of Southern California Keck School of Medicine, Director, University of Southern California Institute for Global Health. Dr. Samet, a pulmonary physician and epidemiologist, is currently Distinguished Professor and Flora L. Thornton Chair, Department of Preventive Medicine at the University of Southern California Keck School of Medicine and Director of the University of Southern California Institute for Global Health. His career has centered on epidemiologic research on threats to public health and using research findings to support policies that protect population health. His research has addressed indoor and outdoor air pollution, smoking, radiation risks, cancer etiology and outcomes, and sleep. Dr. Samet received an M.D. from the University of Rochester School of Medicine and Dentistry and an M.S. in epidemiology from the Harvard School of Public Health. He has been chair of the Clean Air Scientific Advisory Committee of the U.S. EPA and currently chairs the FDA's Tobacco Products Scientific Advisory Committee. He received the Surgeon General's Medallion in 1990 and 2006, the 2004 Prince Mahidol Award for Global Health awarded by the King of Thailand, and the 2006 Public Service Award of the American Thoracic Society. He received the Alumni Award of Merit from the Harvard School of Public</p>

				Health, and was named Distinguished Alumnus of the Year by the University of Rochester School of Medicine and Dentistry. He was elected to the Institute of Medicine in 1997.
	Josefina Cabuniag Santos	pusongpayapa@gmail.com	University of the Philippines	Josefina C. Santos is an assistant professor at the Broadcast Communication Department of the College of Mass Communication at the University of the Philippines. She was once a technical assistant for training for the Conservation of Priority Protected Areas of the Philippines Project of the Department of Environment and Natural Resources of the Philippine government. She also serves as overall faculty-in-charge of a Department of Health and the University of the Philippines College of Mass Communication collaborative project for an integrated management of communication materials for the prevention and control of tuberculosis in the Philippines. She is currently a creative consultant of a radio drama program that talks about the University of the Philippines and its services to the Filipino people. She is also the college coordinator for the implementation of the national service training program where students of the Philippines taking baccalaureate degrees and vocational courses are given two-year trainings to become reserve forces to address the country's needs in time of peace and in war. The program currently focuses on military, literacy and civic welfare especially in trainings for disaster risk management, environment protection, health, and safety.
	Mizuki Sata	msata@pbhel.med.osaka-u.ac.jp	Osaka University	Mizuki Sata is a doctoral student at the Graduate School of Medicine, Osaka University studying maternal and child health.

	Sono Sawada	25b14007@sahs.med.osaka-u.ac.jp	Osaka University	Sono Sawada is a master student at the Graduate School of Osaka University, Department of Medicine, Division of Health Science. She obtained a bachelor's degree in Osaka University, Division of Health Sciences. She is interested in epidemiological research of cancer and social epidemiology.

	Atsuko Sawanobori	atsuko.hisui6@gmail.com	Osaka University	Atsuko Sawanobori belongs to the Osaka University Graduate School of Medicine, Division of Health Science, Department of Molecular Biochemistry & Clinical Investigation. She is a 1 st year student in the master's course. Her research theme is functional analysis of glycan-lipid complex, which involves in membrane traffic as cancer-associated cell polarity. She works very hard even at weekend and/or mid night. She has a lot of knowledge on basic biochemistry and therefore teaches Biochemistry in the nursing school as a part-time teacher.
	Yun-Ju Shih	b00801038@ntu.edu.tw	National Taiwan University	Yun-Ju Shih was an undergraduate student in the College of Public Health of National Taiwan University from September 2011 to July 2015. She was the Captain of 42th NTUPH service team in 2014. She majored in statistics during her undergraduate study. She will begin her master degree program at the Institute of Epidemiology and Preventive Medicine of National Taiwan University in 2015. She is interested in epidemiology and modelling of infectious disease. Her recent study is about modelling the effect of BCG vaccination against tuberculosis.
	Senice So	senice.so@sydney.edu.au	University of Sydney	Senice So is responsible for developing key strategic relationships in regards to research and innovation, capacity building, teaching and learning and community engagement. Senice has extensive experience of building relationships and working with the University's partners particularly in Asia. Her qualifications include an MBA. She provides analysis, program development, support and advice on relationships with partners in the following countries and regions. These regions: East Asia, selected countries in South East Asia, and The Americas. These countries in Asia include: China, Hong Kong, Malaysia, Myanmar, Mongolia, Singapore, Thailand, Japan, and Korea.

	Tomotaka Sobue	tsobue@envi.med.osaka-u.ac.jp	Osaka University	<p>Tomotaka Sobue is a Professor of Division of Environmental Medicine and Population Sciences, Graduate School of Medicine, Osaka University since 2012. He received his M.D. from Osaka University School of Medicine in 1983. He entered Department of cancer control and statistics, Osaka Medical Center for Cancer and Cardiovascular disease in 1983. After one-year training for internal medicine for respiratory diseases at the hospital, he started his research activity in the field of cancer epidemiology for lung cancer and evaluation study for lung cancer screening. In 1986-87, he joined Johns Hopkins University School of Public Health and completed MPH degree. In 1994, he moved to National Cancer Center Research Institute, Tokyo, as a Section Chief, Cancer Etiology Section, Cancer Information and Epidemiology Division. He became a Chief of Cancer Information and Epidemiology Division, NCC Research Institute in 2002, a Chief of Statistics and Cancer Control Division, Research Center for Cancer Prevention and Screening, NCC in 2003, and Chief of Surveillance Division, Center for Cancer Control and Information Services, NCC in 2006. He was responsible to cover following activities; 1) developing cancer registration system, 2) developing guideline for cancer screening and 3) establishing comprehensive cancer control activities at national level.</p>
	Mary Story	mary.story@duke.edu	Duke University	<p>Mary Story joined Duke University January 2014 as a Professor in Community and Family Medicine, and Global Health. She is also Associate Director of Academic Programs at the Duke Global Health Institute. Prior to coming to Duke, she was a Professor in the Division of Epidemiology and Community Health, and Senior Associate Dean for Academic and Student Affairs and in the School of Public Health, University of Minnesota where she was also adjunct professor in the Department of Pediatrics, School of Medicine. Since 2005, she has been director of the National Program Office for the Robert Wood Johnson Foundation Healthy Eating Research program. Mary has devoted her research career to the study of child and adolescent obesity and nutrition, focused primarily on 1) nutrition-related issues of low-income and minority youth, 2)</p>

				factors related to eating patterns and behaviors of youth, and 3) environmental, policy and behavioral community-based obesity prevention interventions for youth. She has over 450 scientific publications in the area of child and adolescent nutrition and obesity prevention. She is a member of the Institute of Medicine, and is currently on the IOM Food and Nutrition Board and Co-Vice Chair of the IOM Roundtable on Obesity Solutions. She has been a member of several IOM committees. She served on the 2015 USDA/DHHS Dietary Guidelines Advisory Committee.
	Tin Tin Su	tstin@ummc.edu.my	National University of Malaysia	Tin Tin Su is a public health specialist and health economist. She graduated from the Institute of Medicine (I), Yangon in 1991. She has a Master of Community Health and Health Management degree (2001) and a Doctor of Medicine (2006) from the School of Medicine, Heidelberg University, Germany. She has working and research experiences in Myanmar, Germany, Nepal, Burkina Faso and Malaysia. Her research interest includes health economics, health system and policy, social determinants of health, cancer awareness and health literacy, and community health development. She involves in several research projects. She is a founding member of the Centre for Population Health (CePH) and appointed as Head of the research centre since March 2011. She was elected as a vice president for the Asia Health Literacy Association and leads the research and development team.
	Suriah	suriah.syam.2610@gmail.com	Hasanuddin University	Suriah, S.KM, M. Kes, received a degree majoring in Health Promotion and Behavioral Sciences from the School of Public Health, University of Hasanuddin in 1998. She earned a master's degree with specialization in Health Promotion and Behavioral Sciences from the University of Indonesia in 2001, and a Doctorate in Health Promotion and Behavioral Sciences in 2011 from the University of Indonesia in the field of behavior change communication expertise and health promotion. She began her career as a lecturer at the Faculty of Public Health at the University of Hasanuddin in 2002 and will serve as Head of the Health Promotion and Behavioral Sciences Department at the Faculty of Public

				Health of Hasanuddin University from 2015 to 2019.
	Putu Sutisna	psutisna@yahoo.com	Warmadewa University	Putu Sutisna MD retired from the Faculty of Medicine Udayana University in 2008 after having served in that University for 38 years. At present he is professor and head of the Department of Parasitology and Microbiology at the Faculty of Medicine and Health Science, Warmadewa University in Denpasar Bali. His main research interests include epidemiology of Taenia/cysticercosis and soil-transmitted helminth infection.
	R Sutiawan	rsutiawan@yahoo.com	University of Indonesia	Sutiawan is a researcher at the Centre for Biostatistics, Public Health Informatics and Population Studies, Faculty of Public Health, Universitas Indonesia. He has been involved in community engagement programs over the past two years. Sutiawan has extensive experience in multidisciplinary research and interactions with stakeholders and has completed some government projects. His project experience includes: community-based disease surveillance information systems, development of household based food crops cultivation for food/nutrition security, community-based sanitation management. Program sustainability is his concern, as that is a major challenge in many developing countries.
	Shino Takezawa	shino4e6ypawka@icloud.com	University of Tsukuba	Shino Takezawa is a master degree student, studying public health at the University of Tsukuba in Japan. Originally graduating from university with a degree in economics, she has previously worked as a nurse trainer at a nursing school for two years, and for eight years as an ICU nurse. It was actually when she was working in Uzbekistan with Japan International Cooperation Agency (JICA), helping to improve ICU nursing care in that country, she became interested in global health care and decided to return to university. As part of her current course, and in order to conduct research for her thesis, she has spent time in Bangladesh, meeting the local people and carrying out questionnaires. When she isn't

				studying hard, she likes to relax by playing the flute, an instrument that she has been playing for more than thirteen years. Indeed, she comes from a musical family, as her father is a baritone. She currently lives in her hometown of Tokyo with her partner.
	Yukina Takuse	y.takuse@sahs.med.osaka-u.ac.jp	Osaka University	Yukina Takuse is a graduate student at Osaka University. She is also a certified laboratory medical technologist. Her research is in prognostic diagnosis.
	Oscar Tamez Rivera	otr_39@hotmail.com	Escuela de Medicina del Tecnológico de Monterrey.	Oscar Tamez is currently a second-year pediatrics resident at Escuela de Medicina y Ciencias de la Salud Tecnológico de Monterrey in Monterrey, Mexico. He is particularly interested in Global Health and Infectious Diseases in the pediatric population. He has authored several publications on HIV and is currently investigating bacterial resistance to antibiotics in children.
	Emiko Tanaka	warakott@gmail.com	University of Tsukuba	Emiko Tanaka is a Research Fellow at the Faculty of Medicine at University of Tsukuba, Japan. She has experience as clinical nurse and holds a PhD in Medicine (University of Tsukuba, 2012). Her main research interest is maternal and child health, especially life span development and plasticity. In particular, she is focused on social relationships and social competence, from the longitudinal perspective. She has conducted various cohort study projects using a community-based approach. The Community Empowerment Cohort (CEC study) sought to investigate factors associated with well-being and healthy longevity, with the goal of creating a health-promoting program that would maximize quantity and quality of life for residents.

	Yukiko Tateyama	yk3-beautemps@hotmail.co.jp	Kyoto University	<p>Yukiko Tateyama is a pharmacist in Japan. She obtained her MPH from Kyoto University School of Public Health, Japan and now pursuing her DrPH program in the Department of Global Health and Socio-epidemiology at Kyoto University School of Public Health. Under JICA Volunteer program in 2010, she participated in HIV/AIDS initiatives as a program officer in the rural governmental office in Zambia. The experience ignited her interests on global health issues; especially in understanding risk factors for non-communicable diseases in the social, cultural, and economic contexts in the Sub-Saharan African region which she undertook as her research. For her master's thesis, she conducted qualitative research on risk perception, behavior and socio-cultural factors related to non-communicable diseases in Zambia, and is currently continuing further epidemiological research in the same area using a mixed method approach.</p>
	Paula Tavrow	ptavrow@ucla.edu	UCLA	<p>Paula Tavrow, PhD, MSc, MALD is the Director of UCLA's Bixby Program in Population and Reproductive Health and Adjunct Associate Professor in the Community Health Sciences Department at the UCLA Fielding School of Public Health. In addition, she is co-Director of the University of California Global Health Institute's Center of Expertise in Women's Health & Empowerment. Her current research interests center on adolescent reproductive health, coerced sex, gender-based violence and the quality of primary health care in developing countries. Prior to coming to UCLA in 2002, Dr. Tavrow was the Deputy Research Director for the USAID-funded global Quality Assurance Project (1997-2001). She oversaw eleven operations research projects to improve the quality of rural health services in sub-Saharan Africa. Dr. Tavrow also has worked for the University of Malawi's Centre for Social Research and for USAID missions in Somalia, Tanzania, and Zaire. She received her AB (magna cum laude) from Harvard-Radcliffe College, her MALD from the Fletcher School of Law and Diplomacy at Tufts University, and her MSc and PhD from the School of Public Health at the University of Michigan in Ann Arbor.</p>

	Richard Taylor	r.taylor@unsw.edu.au	University of New South Wales	Richard Taylor is Professor of Public and International Health at the University of New South Wales. He has continuing international experience in the Asia Pacific, particularly in the Pacific Island region, but also in China, Mongolia and Vietnam, and has been involved in the epidemiology and disease control aspects of the health transition, especially concerning cardiovascular disease, diabetes and cancer. He also has experience in control of communicable and vector-borne disease. Current research in the Pacific Islands focuses on mortality and cause of death analysis for the prioritisation and evaluation of prevention and control activities.
	Khampasong Theppanya	pasong05@yahoo.com	MOH, Laos	Khampasong Theppanya earned a Bachelor degree in general medicine in 1992 and a Master in Public Health in 2011. He gained experience in all dimensions of the health system in Lao during his 20 years career holding various senior management positions, amongst else Ministry of Health level and at district/provincial level. This involved various roles and responsibilities for management and design of the Lao Health system. During 2007-2011 he developed a Health staff projection of MOH, Laos. He was a temporary adviser to the WHO on developing Service Target Staff Projection Tool of the Philippines and the MOH of Cambodia. In 2009, he was a national consultant for the 7167-LAO Health Sector Development Program in the position of Human Resources Development Expert. He involved in making the analysis of the situation of human resource for health of Lao PDR and developing the Health Personnel Development Strategy by 2020.
	Le Minh Thi	lmt@hsph.edu.vn	Hanoi	Le Minh Thi is a senior lecturer in the Department of Reproductive Health at the Hanoi School of Public Health. Her background is as a medical doctor and in health social sciences. Her research interests include: health policy, reproductive health, maternal and child health. She is involved in a variety of projects with the DFID, the World Bank, WHO and the Vietnam Ministry of Health.

	<p>Frances Tinker Larson</p>	<p>larsonwf@sbcglobal.net</p>	<p>California State University Northridge</p>	<p>Frances Tinker, MD graduated with honors from University of Southern California School of Medicine in 1978. She practiced Pediatrics for 20 years and Health Administration for 7 years. She is now a Visiting Scholar in Global Health at California State University with a special focus on Environmental Health and Nutrition.</p>
	<p>Indang Trihandini</p>	<p>dini05@ui.ac.id</p>	<p>University of Indonesia</p>	<p>Indang Trihandini is a lecturer in the Department of Biostatistics and Population, Faculty of Public Health, University of Indonesia. She has more than 20 years of teaching experience in biostatistics, and community health at the Faculty of Public Health. She graduated from Faculty of Dentistry, University of Indonesia, Indonesia (1985). She also received a Master of Public Health from the University of Indonesia (1994) and a Doctoral degree in Public Health (PhD) from University of Indonesia (2007). Her professional work includes analysing and conceptualizing and implementing operations research (OR) in national and international projects in many areas such as maternal health, under-five child health, HIV/AIDS and quality of life among the elderly. Her teaching career began in 1988 with an emphasis on facilitating students' gain of knowledge especially on practical quantitative research methods. She has taught courses on intermediate biostatistics, and the application of population and health indicators in the context of improving child and elderly health. Between 2007–2014, she was a chairman of Dept of Biostatistics and Population Studies. She is Secretary in Collegiums' Biostatistics in Indonesia Public Health Association since 2009 and Counselor at Indonesian Medical Informatics Association since 2007. She has experience with many foreign organization, such as WHO, UNICEF, USAID and East West Center. She taught short-courses at the National University of Malaysia (UKM) and at the Population Council, Vietnam. Her public health and quantitative methods experience allow her to work in planning, organization, problem-solving, and designing coordination strategies.</p>

	Hsin-Yun Tsai	d98843003@ntu.edu.tw	National Taiwan University	<p>Hsin-Yun Tsai is a PhD candidate in Health Policy and Management at the National Taiwan University College of Public Health, Institute of Health Policy and Management. She received her Master's degree in Health Care Organization Administration from the National Taiwan University College of Public Health. Her research interests are healthcare quality improvement, performance measurement, healthcare management and secondary data analysis. She currently works for her advisor, Dr. Kuo-Piao Chung, on a project using Taiwan Cancer Registry data and National Health Insurance claims data to investigate the relationship among healthcare quality, provider volume and patient outcome in hypopharyngeal carcinoma.</p>
	Jessica Tsay	jessicajaytsay@gmail.com	National Taiwan University	<p>Jessica Tsay is an international student from the US pursuing the MPH degree in epidemiology at National Taiwan University. Her past research was related to marine biology, but her greatest interest is in human health. She plans to learn more about infectious disease.</p>
	Yu-Hwei Tseng	mayeeshatk@gmail.com	National Taiwan University	<p>Mayeesha Yu-hwei Tseng has just obtained her Ph.D degree in August, 2015 from the College of Public Health, National Taiwan University. Her research interests include primary health care, health system, health inequalities, GO-NGO dynamics and global health. Bangladesh has been her field for the last 10 years. She maintains a close relationship with health NGOs in Bangladesh. Her doctoral dissertation titled "When creditor and health provider collide: exploring the myths of hospitals run by microfinance institutions in Bangladesh" is the result of her encounter with microcredit over a decade and the training in social determinants of health. Being the Chinese translator for two books, "Banker to the Poor" and "Creating a World without Poverty" authored by Muhammad Yunus, and being married to a Bangladeshi, she was initially advocating microcredit in Taiwan. However, by looking</p>

				at hospital-based health programs on the platform of microfinance from an equity lens and in the framework of health system, she pinpointed the gap between ideal and reality and offered a different suggestion for policy makers and development organizations. Aside from microcredit and health, she followed the MDGs and reviewed Taiwan's progress. She has been urging the academics and government in Taiwan to take stock of MDGs and participate in the post-2015 development agenda setting.
	Norshazira Binti Umran	shaz_ira@ymail.com	National University of Malaysia	Norshazira Umran is a postgraduate student in National University of Malaysia (UKM), conducting full time research regarding environmental and occupational health. Her current research is related to workers' health exposure to volatile organic compounds in air. She also graduated also from UKM with a bachelor of Environmental Health in 2012. She is a creative, confident and responsible person. Norshazira is also self-motivated, persuasive, enjoys working with people and has good communication abilities.
	Paolo Miguel Manalang Vicerra	paolo.vicerra@phikappaphi.up.edu.ph	City University of Marikina	Paolo Vicerra is an instructor at the City University of Marikina, Philippines. He finished the Demography graduate programme of Chulalongkorn University in Thailand. His research concerns morbidity and mortality analyses; and also on population and development themes as disaster risks, health and gender development; and education. Paolo Vicerra is a Fellow of the Philippine Center for Population and Development at the University of the Philippines Population Institute under the Demography programme. His present research concerns demographic estimation and population and development.

PHOTO	NAME	EMAIL	UNIVERSITY	BIO
	Mami Wakabayashi	mn5082wm@ecs.osaka-u.ac.jp	Osaka University	Mami Wakabayashi (MPH, Public Health Nurse) is PhD candidate for public health in Graduate school of Medicine, Osaka University in Japan. She have visited National Centre of Epidemiology and Population Research (NCEPH) in Australia National University in order to involve in research in Thai Cohort Study, which are conducted by NCEPH and Sukhothai Thammathirat Open University in Thailand. Her research interest is global health issue, especially how to prevent non-communicable diseases in developing countries. She had experienced research- field work in some of Asian countries such as Vietnam, Thailand, Philippine, Korea, China and had internship WHO Weston Pacific Region Office, and UNICEF Vietnam.
	Shengnan Wang	13211020009@fudan.edu.cn	Fudan University	Shengnan Wang received her Bachelor of Medicine degree in School of Public Health at Fudan University. She continued to be a master candidate majoring in Epidemiology and Health Statistics there since 2013. She has been involved in several studies and has published an article predicting direct medical costs of hospitalizations for cardiovascular diseases in Shanghai. Now she is mainly working on projects aiming to determine the transmission of major infectious diseases such as tuberculosis and hepatitis B. Her current study is to explore the genetic diversity of the Mycobacterium tuberculosis W-Beijing genotype in eastern China.
	Weibing Wang	wwb@fudan.edu.cn	Fudan University	Weibing Wang is an associate professor at Fudan University, China. There he received his Ph.D. degree of epidemiology, focusing on infectious diseases epidemiology. After that, he was involved in several significant studies; some of them aim to determine the transmission in population of major infectious diseases such as tuberculosis. Quite a few of papers were published during this period. In 2004, he worked in the lab of Public Health Research Institute as a visiting fellow at the International Center for Public Health, U.S. In 2008-2009, he received an opportunity to work in Georgetown University, US, as a post-doctor that is an extraordinary opportunity, to offer a cultural perspective

				in public health prevention and control. His current research projects involve molecular mechanism of transmission and policy issues related with major infectious diseases including tuberculosis, HIV/AIDS and HBV.
	Ayano Watanabe	25b15088@sahs.med.osaka-u.ac.jp	Osaka University	Watanabe Ayano is a graduate student of Osaka University Graduate School of Medicine and certificated laboratory medical technologist. Her research field is the prognostic diagnosis. She participates in activities of center for twin research.
	Kumi Watanabe	kuchangm@gmail.com	University of Tsukuba	Kumi Watanabe is currently a second year in master of public health course at University of Tsukuba, Japan. When she was in her undergraduate studies, she studied nursing and now her research interests focus on community elderly care.
	Pornpun Watcharavitoon	pornpun@sut.ac.th	Suranaree University of Technology	Pornpun Watcharavitoon works as a lecturer at School of Occupational Health and Safety, Institute of Medicine, Suranaree University of Technology. She strongly believes that graduates must have interdisciplinary knowledge and liberal arts skills to relate and apply their knowledge in the real world in their careers and also they can help improve and contribute their experience to the community and society. As mentioned, to gain the high caliber graduates, the lecturer must be the one who can transfer knowledge and experiences effectively. In addition to the knowledge, experiences, liberal arts skills obtained from APRU Global Health Program Workshop, she continues to utilize this Network alumni association to pursue the activities like the capacity building of local

				people and the graduates through the educational processes so they can contribute to the community, society and the nation as well as Southeast Asia.
	Heather Wipfli	hwipfli@usc.edu	University of Southern California	<p>Heather Wipfli is an Assistant Professor in the Department of Preventive Medicine at the USC/Keck School of Medicine and in the Department of International Relations at the USC Dana and David Dornsife College of Letters, Arts and Sciences. She is also the Associate Director of the USC Institute for Global Health. Her research focuses on global health politics and the development of innovative forms of global health governance. Dr. Wipfli has been engaged in global health research for over 10 years, focusing on developing multi-national research protocols that can identify determinants of health that lie beyond the control of any one country or community, and that require an international response to address them. She has successfully led a number of large multi-country research and capacity building projects focused on global tobacco control research and policy, including a study of secondhand smoke in homes in over 30 countries. These studies have led to policy change at the local and national level and have contributed to the scientific foundation for global policy recommendations by the World Health Organization. Prior to joining USC, Dr. Wipfli directed research and training for the Institute for Global Tobacco Control at the Johns Hopkins Bloomberg School of Public Health and also worked as a technical officer at the World Health Organization headquarters in Geneva on the development of the Framework Convention on Tobacco Control. Dr. Wipfli received her doctorate in international relations from the Graduate Institute for International Studies at the University of Geneva and was awarded the Alumni Laureate Award in 2007. Dr. Wipfli has published work on global tobacco control, policy diffusion, capacity building in developing countries, globalization and health, and health security.</p>

	Mellissa Withers	mwithers@usc.edu	University of Southern California/ APRU	<p>Mellissa Withers is an Assistant Professor at the University of Southern California at the USC Keck School of Medicine in the Institute for Global Health in Los Angeles. She is also the Program Manager of the APRU Global Health Program since August of 2013. She received a PhD in community health sciences from the UCLA Fielding School of Public Health with a minor in cultural anthropology. She also holds a Master's in International Health from the Johns Hopkins Bloomberg School of Public Health and a BA in international development from UC Berkeley. Dr. Withers is an experienced health researcher who has worked in Asia, Africa and Latin America. She spent fifteen months conducting fieldwork in a rural village in Indonesia for her dissertation. Her primary research interests lie in community participatory research, maternal and child health, women's empowerment, violence and human trafficking and global reproductive health, including family planning, and HIV prevention. She teaches courses in global health, medical anthropology and qualitative research methodology.</p>
